

KUBOTA ACTIVITY STANDARD

Demonstration Activity

A simple product demonstration guide for distributors, dealers, and event teams

Purpose of this activity Let customers see KUBOTA Diesel Engines and TRA CHANG Power Tillers working in real paddy-field conditions, understand how to use them, and try driving before making a purchase decision.

1. Venue

- Choose an easy-to-reach agricultural field with enough space for product demonstration and supervised customer test drives.
- A field of around 0.25–0.5 hectare is recommended, or adjust the size to suit the demonstration and implements.
- Prepare the paddy field to suit the product model and implements used in the demonstration.
- Clearly separate the demonstration field, test-drive area, customer tent, parking, and machine access route.

2. Number of Participants

- Invite at least 30 customers per event.
- Around 30–50 people is recommended so everyone can see the demonstration and the team can supervise test drives properly.

3. Target Customers

- Farmers looking for diesel engines or power tillers for demanding agricultural work.
- Customers who want to see real field performance before buying.
- Users of other brands who want to compare product performance.
- Customers who want to learn correct operation and select suitable implements.

4. Required Activities

- Register and welcome customers, and explain the key instructions before entering the demonstration area.
- Introduce the KUBOTA Diesel Engine, TRA CHANG Power Tiller, and the implements used in the event.
- Demonstrate the products in a real paddy field using implements suitable for the product model and local field conditions.
- Explain product controls, correct operation, and key benefits during the demonstration.
- Let customers test drive one at a time in the designated area, with close supervision from the team.
- Summarize the demonstration and allow customers to ask questions.

5. Optional Activities

Fuel consumption test: Compare with a competitor engine or power-tiller engine of similar power. The distributor may request further advice from the KUBOTA expert team.

Working-speed test: Use the same area and timing method, then explain the results in a simple way.

Promotion or installment plan: Prepare clear conditions and assign a team member to explain them.

Lucky Draw and refreshments: Prepare coupons and prizes, with snack boxes and drinking water for customers.

01 | FIELD AND EQUIPMENT PREPARATION

Suggested Event Zones

01 Registration & Welcome

Register customers, distribute souvenirs or coupons if provided, and explain key instructions.

02 Customer Tent

Prepare chairs, drinking water, cold towels, and a clear view of the field.

03 Demonstration Field

Set the driving route, start and finish points, and field boundary.

04 Test-Drive Area

Separate it from the viewing area and supervise customers one at a time.

Recommended Items for One Event

Products	TRA CHANG Power Tiller and KUBOTA Diesel Engine Use the models sold in the country where the event is held.
Implements	NC Plus X: Moldboard Plow and 2-Disc Plow NC Plus X Special: Rolling Harrow and Ride-on Disc Plow
Customer Area	Tent and around 30–50 chairs Drinking water, cold towels, microphone, and portable sound system
For a Fuel Test	Compare with a competitor engine or power-tiller engine of similar power. Further advice may be requested from the KUBOTA expert team.

Suggested Team

- Registration and customer welcome team
- Product and implement presenter
- Experienced demonstration driver
- Team supervising customer test drives
- Sales team for Q&A and customer follow-up

Note Products, implements, and field size are recommendations. Adjust them to suit the local field, agricultural work, and products being demonstrated.

Pre-Event Checklist

- ☐ Invite at least 30 customers and tell them that this is an outdoor activity.
- ☐ Prepare the paddy field to suit the products and implements used in the demonstration.
- ☐ Prepare the TRA CHANG Power Tiller, locally sold KUBOTA Diesel Engine model, and selected implements.
- ☐ Test the machines and driving route before customers enter the field.
- ☐ Prepare the tent, chairs, drinking water, cold towels, microphone, and sound system.
- ☐ Clearly separate the demonstration field, viewing point, and test-drive area.
- ☐ Assign the demonstration driver and team members supervising customer test drives.
- ☐ For a fuel or speed test, prepare the equipment, test conditions, and result-recording method.

02 | EVENT DAY

Sample Agenda

Time & Duration	Activity	In Charge	What to Do
08:30–09:30 (60 min)	Registration and Welcome	Dealer Team	Register customers and distribute souvenirs or Lucky Draw coupons if provided. Welcome customers under the tent with drinking water and cold towels.
09:30–09:50 (20 min)	Product and Feature Introduction	Technical Presenter	Introduce the KUBOTA Diesel Engine, TRA CHANG Power Tiller, and selected implements. Use models available in the local market.
09:50–10:20 (30 min)	Real-Field Demonstration	Demonstration Team	Demonstrate the products in a real paddy field using a Moldboard Plow, 2-Disc Plow, Rolling Harrow, or Ride-on Disc Plow as appropriate.
10:20–10:40 (20 min)	Customer Test Drive	Demonstration Team / Customers	Invite customers to test drive one at a time in real field conditions. Explain the controls and supervise each customer closely.
10:40–10:50 (10 min)	Fuel Consumption Test (Optional)	Demonstration Team	If included, compare with a competitor engine or power-tiller engine of similar power. Advice may be requested from the KUBOTA expert team.
10:50–11:00 (10 min)	Summary and Q&A	MC / Sales Team	Summarize what customers saw, announce test results if applicable, and answer customer questions.
11:00–11:30 (30 min)	Promotion, Lucky Draw & Refreshments (Optional)	MC / Sales Team	If included, explain the promotion, run the Lucky Draw, and provide snack boxes and drinking water before closing the event.

Note: The timing and activity order may be adjusted to suit field conditions, customer numbers, and local needs. If the fuel test, Lucky Draw, or refreshments are not included, use the time for the field demonstration and customer test drive.
