

KUBOTA ACTIVITY STANDARD

Mobile Service

A simple on-site service guide for dealers and event teams

Purpose of this activity Bring technicians and after-sales service closer to customers. Provide a free basic product check and show customers how to use and maintain their products correctly, so the products can work well for a long time.

1. Venue

- Choose an area with a group of KUBOTA product owners where customers can easily bring their products for service.
- Provide enough space for product reception, waiting, inspection, parts replacement, and a spare-parts booth.
- Make sure KUBOTA Diesel Engines and TRA CHANG Power Tillers can enter and leave the area easily. Provide shade for technicians and customers.
- Clearly separate the registration area, waiting area, inspection area, and spare-parts booth.

2. Number of Participants

- Invite at least 20 customers per event.
- Ask customers in advance what type and how many products they will bring, so the dealer can prepare enough technicians, equipment, and spare parts.

3. Target Customers

- Customers who own a KUBOTA Diesel Engine or TRA CHANG Power Tiller.
- Customers who live far from the dealer or cannot easily bring their products to the dealer for service.

4. Required Activities

- Register customers, receive their products, and place the products in the inspection queue.
- Provide a free basic 5-point check for both KUBOTA Diesel Engines and TRA CHANG Power Tillers.
- Show customers the correct way to use and maintain each type of product.
- If a part has reached its replacement interval or needs replacement, advise the customer and replace it as appropriate.
- Prepare commonly used spare parts for sale at the event.
- Return the product after the inspection or parts replacement is complete.

5. Optional Activities

Short group maintenance session: Use about 10–15 minutes to review the key points customers should check regularly.

Spare-parts or maintenance-kit promotion: Prepare a clear product list, prices, and conditions.

Drinking water and light snacks: Prepare enough for the number of customers and the expected waiting time.

01 | AREA AND EQUIPMENT PREPARATION

Suggested Event Areas

01 Registration & Product Reception

Register customers, receive products, and place them in the inspection queue.

03 Inspection & Parts Replacement

Prepare a technician work area with the required inspection equipment and spare parts.

02 Waiting Area

Provide an orderly parking area for engines and power tillers waiting for service.

04 Spare-Parts Booth

Display and sell engine oil, filters, belts, and other spare parts.

Recommended Items for One Event

Products Serviced	KUBOTA Diesel Engines and TRA CHANG Power Tillers Use the standard 5-point checklist for each product type.
Inspection Equipment	Basic inspection equipment for diesel engines and power tillers, together with inspection forms.
Spare Parts	Engine oil, filters, belts, and other spare parts Further advice may be requested from the KUBOTA team.
Customer Area	A tent or shaded area, chairs, product waiting space, and drinking water for customers.

Suggested Team

- Registration, product reception, and queue-management team
- Technicians who can inspect both KUBOTA Diesel Engines and TRA CHANG Power Tillers; one technician for every five customers is recommended
- Team responsible for usage guidance, maintenance advice, and spare-parts sales

Note Adjust the number of technicians, inspection equipment, and spare parts according to the number of customers and the product types and models confirmed in advance.

Pre-Event Checklist

- ☐ Invite at least 20 customers and confirm what type of product each customer will bring.
- ☐ Prepare the registration area, waiting area, inspection area, and spare-parts booth.
- ☐ Prepare technicians who can inspect both product types; one technician for every five customers is recommended.
- ☐ Prepare basic inspection equipment for diesel engines and power tillers, together with inspection forms.
- ☐ Prepare engine oil, filters, belts, and other spare parts suitable for the products customers will bring.
- ☐ Assign the teams for product reception, queue management, inspection, maintenance guidance, and spare-parts sales.
- ☐ Prepare a tent or shaded area, chairs, and drinking water for customers waiting for service.

02 | EVENT DAY

Sample Agenda

Time & Duration	Activity	In Charge	What to Do
08:30–09:00 (30 min)	Area and Team Preparation	Lead Technician / Dealer Team	Prepare the area, inspection equipment, spare parts, forms, and review each team member's responsibilities.
09:00–09:30 (30 min)	Registration & Product Reception	Registration Team	Register customers, receive their products, and place the products in the inspection queue.
09:30–11:30 (120 min)	Basic Inspection & Service	Technicians / Parts Team	Complete the basic 5-point check for both product types and show customers how to use and maintain them correctly. If a part has reached its replacement interval, advise the customer and replace it as appropriate.
11:30–11:45 (15 min)	Group Maintenance Guidance (Optional)	Lead Technician	Review correct usage and the key maintenance points customers should check regularly, then open the floor for questions.
11:45–12:00 (15 min)	Product Return & Closing	Dealer Team	Return the products, record the service completed, and provide the dealer contact details for any additional service needs.

Note: The timing and activity order may be adjusted according to the number of customers, number of products, and local conditions. If the group guidance session is not included, use the time for inspection and service.
